PROJECTS

Vaani Video — Video Conferencing App | *React.js · Node.js · Express.js · MongoDB · WebRTC · Tailwind CSS*

- Built a full-featured MERN stack video conferencing platform with real-time peer-to-peer audio/video using WebRTC.
- Implemented a responsive React.js frontend styled with Tailwind CSS and Bootstrap for seamless cross-device experience.
- Designed RESTful backend APIs with Node.js and Express.js; managed session and user data using MongoDB.
- Deployed with Docker containers for consistent development and production environment parity.

Wanderlust — Property Listing Platform | *React.js · Node.js · Express.js · MongoDB · JWT Auth*

- Developed an Airbnb-inspired full-stack web app enabling users to list, explore, and book properties.
- Implemented secure user authentication with JWT and bcrypt; enforced role-based access control.
- Designed a RESTful API backend with CRUD operations and integrated MongoDB for persistent storage.
- Built a responsive React UI with intuitive property search and booking workflow.

AI Chat Assistant — ChatGPT Integration | *React.js · Node.js · OpenAI API · REST*

- Integrated OpenAI's GPT API to deliver an intelligent, context-aware conversational assistant.
- Engineered a clean, responsive chat UI with streaming responses and conversation history management.
- Handled prompt engineering and API integration on the backend to optimize response quality.
